

Frequently Asked Questions

What kind of training is required to use the SkySaver device?

SkySaver is easy to use and requires no prior training. To ensure that you are familiar with all aspects of the device, each SkySaver is packaged with a comprehensive user manual, so that you can be fully prepared for an emergency.

Is the SkySaver suitable for children?

Yes, anyone that weighs a minimum of 66 lbs. (30kg) can use the SkySaver device. We recommend that you store your SkySaver backpack out of reach of children so that they are not tempted to play with it. Additionally, each SkySaver is packaged with a tamper-evident seal so that you will know if your safety has been compromised.

How many times can the SkySaver device be used?

The device is designed to be used once and only in an emergency situation. If the device has been used, please contact 855-759-7283.

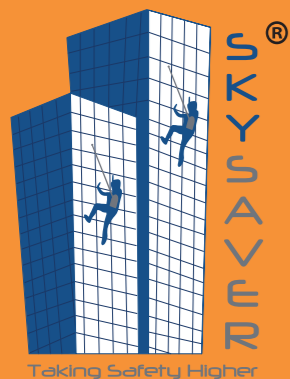

What warranty does the SkySaver device have?

The SkySaver device carries a 7 year limited manufacturer's warranty that covers all defects relating to manufacturing process, to the exclusion of any defects related to wear and tear or tampering with the sealed product. The SkySaver team stands behind its products and we are available to answer your questions during office hours at 855-759-7283.

Where can the SkySaver device be purchased?

The device can be purchased through our website or authorized resellers.

**If you live or work in a multi-story building,
make the decision now that can save your life.**

**GIVING YOU A SENSE
OF TOTAL SECURITY
EVEN IN
MULTI-STORY
BUILDINGS.**

**SKYSAVER:
PERSONAL
RESCUE
DEVICE**

**FOR SELF-RESCUE
FROM MULTI-STORY
BUILDINGS**

Fact:

Every year 500,000 individuals are killed and injured worldwide from fire and smoke inhalation. When a fire breaks out, people in multi-story buildings, which are not easily accessible to fire and rescue services, can become trapped in the blazing inferno.

Only SkySaver, the most advanced self-rescue device, enables you to reach safety within seconds.

SkySaver – How does it work?

SkySaver is a device in the form of a backpack which contains an integrated harness and a fire-resistant steel cable. In the event of an emergency, connect the cable to a pre-installed anchor point and the unique braking mechanism will enable a safe descent.

SkySaver enables you to escape in three simple steps.

SkySaver Models

SKS 80 (80 ft) / (25 meters)

SKS 160 (160 ft) / (50 meters)

SKS 260 (260 ft) / (80 meters)

SkySaver
Website >>>

Put the backpack on and tighten the straps.

Clip the carabiner to a pre-installed anchor point.

Descend through any opening and the unique braking mechanism automatically lowers you to safety.
